The Kasari Nexus (Rho Agenda Assimilation Book 1)

Synopsis

Jennifer Smythe escapes Earth's invasion by the insidious Kasari race, hijacks an alien starship, and survives the deadly passage through a wormhole. But escape is short-lived. When Jennifer emerges on the new world of Scion, she is confronted by the same deadly enemy. Now the Kasari have sided with the planet's angel-like elite against the warrior underclass, but with the intent of ultimately ruling both. And when Jennifer is captured by the brutish Koranthians, her alien-enhanced abilities make her a crucial asset in battling the Kasari and their winged allies. Back on a divided Earth, Jennifer's brother, Mark, and Jack – The Ripper – Gregory wage their own war against the Kasari. As the global government welcomes the extraterrestrials, Mark, Jack, and their rebel faction seek to use the powerful mind-altering skills gained from the Kasari's sworn enemies to repel the would-be conquerors. But faced with the might of Earth's ruling forces, has the cause already been lost?

Customer Reviews

Richard Philips is a master of Science Fiction and this book does not disappoint. Here, Richard Philips brings together the trilogy of the Rho Agenda Series. Captivating from the first page you will

be held to your seat as the story lines twist and turn across the galaxy . If you haven't read Richard Philips before I would recommend reading the Rho Agenda books first. If you don't want to, this book will stand alone, However, be warned - once read you will be back to kindle to get the first three and delve backward into the story line. Do yourself a BIG favor and discover it today...

The entire Rho Agenda Series is superb. Do read the books in order, as the narrative is a fine tapestry and character development complex. But even if you jump right in and begin with The Karsari Nexus, you'll still be blown away. When searching for a comparison on how captivating this storyline is, the 1994-98 television mega hit "Babylon 5" comes closest. And on my personal ratings scale, that's as high as it gets. Richard Phillips is a master craftsman. Enjoy.

I was happy to finally get my pre-order copy of the book so I could leave a five star review. This is one of the best science fiction books I've read in years, and I've read a few. The story has many surprises and they start off at the very beginning. I have always liked the multiple story lines and multiple perspectives, because it's nice to wonder "what will happen to Character A next?!?" while thoroughly enjoying Character B's story. It was good enough to make me want to reread the previous Rho novels (I am finished with 4 of the 6). They are excellent as well, so if you haven't read them, treat yourself and do so. I received a free, advance copy of this book from the publisher via NetGalley in exchange for my unbiased review

This novel is as much science as it is fiction, and it will draw you into the lives of the main characters to the point where you can feel their emotions. The book begins with a character list and a brief setting of the series of events taking place at the time this book begins. In the effort to close the wormhole gateway that would allow the Kasari to begin their invasion of earth an explosion kills the evil Dr. Stephenson. The resulting events trap Jennifer and Raul in the alien ship and send them into the wormhole headed for God knows where. The United States under the leadership of President Ted Benton has now agreed to join an international alliance known as the United Federation of Nation States, ceding US federal authority to the UFNS. Their dream of building the Stephenson Center for Inter-Species Reconciliation will finally be a reality and a new gateway will be constructed. Jack Gregory, Senator Hagerman and a handful of people who have been given special powers by the Altreian ship that crashed to earth after a battle with the Kasari are tasked with trying to stop the UFNS from rebuilding the gateway. If you haven't read the previous six books, The Rho Agenda and The Rho Agenda Inception series, you will enjoy this book as a

stand-alone episode. But to be fully engaged in the plot, I highly recommend reading all of the books in order, beginning with The Rho Agenda trilogy and the Rho Agenda Inception trilogy.

Here is yet another brilliant book from Mr. Phillips - full of vigour, action, true dilemmas and hard decisions, excellent characters, defining experiences and his famous "Oh, snap!" moments which just spice up the entire story, add entire new dimensions or give a whole new meaning to what has transpired...I find it a truly enjoyable read, and I heartily recommend not only this book, but also his "Rho Agenda" and "Rho Agenda Inception" series (I have read the entire Rho Agenda at least three times, and this is very uncommon for me these days, as my time is always at a premium). For those who have already read the series, all I can say is that "The Kasari Nexus" is just the perfect sequel to an excellent series, and that you are going to enjoy every minute of it :-D.

Here we go again! Wow what a story line. If you have to group them I'd say The Kasari Nexus takes up at the end of the first three, The Rho Agenda (The Second Ship, Immune & Wormhole) and that the second three tell the store of Jack "The Ripper" Gregory and how he got to the point we find him and his partner Janet. (The Rho Agenda Inception: Once Dead, Dead Wrong & Dead Shift) at the beginning of the first three stories. If you, like me, read those as they came out, you may have forgotten some or many points of interest! Worry not as Phillips sneaks in tid bits that jog your memory. And if you have not read the first 6 stories then those tid bits may be enough to answer your questions, "What the heck is going on?" The story, as in the first 6 takes turn after turn. It is so fully told that I think I know where he's going, but knowing his writing I may well be wrong! What do I think? Well you will have to contact me at carlyle@cox.net! Hee hee!New comers you have a treat coming as you read these three stories. Hold on to your hats and computers here we go again! ! ! !
