## Customer Reviews

I was looking forward to this book coming out and it didn't disappoint. There are instructions for creating the beaded sequences you need and more importantly why it works and how to put the rituals and prayers together in a cohesive manner. This book will change your life if you are ready for some prayer and a frame of mind that brings good returns. Truly a first IMO on a subject that is little understood.

Having never considered prayer beads for Pagan rituals, I was very pleasantly surprised how well they work, and how truly enjoyable it is to use them. The book itself is very well written, easy to understand, and has several different Pagan traditions detailed including Hermetics, Wicca, and

Druidism. My wife and I have done several of the rituals in the book, from each of these traditions, and found them very moving! The author sells the prayer beads that go with these rituals and they are excellent! For those who like making their own, he describes them in depth. There is also an intense consecration ritual for the prayer beads in the book to really make them your own. This is a fantastic book not only for learning how to use prayer beads, but offers new ideas and methods for a meaningful Theurgic practice. We love this book!

A very thorough book. Something for whatever faith you practice.
