There is a lot of misunderstanding around the ancient school of thought of Tantra. Most people associate this with something that they should avoid. They think that it is all about sex or that it has some form of dark magic with it. It is not something that should be talked about in polite company and most people will not even take the time to even look it up. Tantra is not something to be ashamed off and it is not all about sex. While it can heighten your pleasure during sex, there is a lot more that can go into this school of study and you can easily perform it without having sex at all. This guidebook is going to spend a bit of time talking about what Tantra is as well as tantric sex and then spend a bit of time going into the steps you should take and the proper tips in order to make this work for you. Customer Reviews

This book is not what I think it is. It was unexpectedly helpful. This book has a guide of what is the best thing you can do before and after making love. From low performance to higher level of making

love and its health benefits. The physiological principles and descriptions throughout the book which were verified to be all true after following the guidelines. My approach has been changed forever. Anyone I discuss it with appears to be naturally drawn to the concept as well. It also discusses sexual dysfunction which makes a lot of sense. I highly recommend this book not because it gives a clinical technique on how to please a woman, rather it's more of an inward journey into oneself. This is the best book to enhance your sexual drive and mental health.

To be honest I never really knew what Tantric massage was, to me it sounded erotic and I never put much more thought into it. That was until I found this book, while in fact it is part of a religious practice. This book tells you how to prepare yourself and space to perform the massage. My favorite tip was the use of a feather. It covers the entire body and encompasses the need for people to 'touch' another person. Sort of like it's hardwired somewhere deep in our primitive brains that we crave the touch of our life partner.

A couple of months back I encountered my first (expert) tantric back rub and it must be one of the best experiences of my life. I hope this book will let you know how to get ready yourself and space to perform the back rub. I've never felt more transparent than after that back rub. I'm seeing someone and needed to give this experience to my better half. My most loved tip was the utilization of a quill. It covers the whole body and envelops the requirement for individuals to "touch" someone else. I think this helpful book will help you open what you as of now need to encounter an astounding back rub. Generally this aid is extremely educational particularly in the event that you need to find out about Tantras. This book was exactly what I was searching for: it manages you through the entire back rub from beginning to end.

This book has given me a new way of exploring intimate recognition of body parts through the procedure of tantric massage. Such alternative form of massage can surely benefit me and my partner in relieving stress and in inducing more pleasurable moments in a very wholesome way. Practically, the guides and tips to get the most effective results of tantric massage are very easy to follow. They are also well-presented in this book.

I've been looking for alternative ways to relieve stress for some time now. For the most part, I've used the gym for my stress release but it just doesn't seem to be working like it used to. That's when I found this tantric massage! It's a good thing my wife is on board for giving this a try.

Massages and romance equals awesomeness. This book shows me how to give massage to my love the right way. By getting the right spots, I have improved our love satisfaction and relationships significantly. Thanks for taking my romantic relationship to the next level!

This book is great for beginners. It has informative descriptions on moves and lovely tips. It even tells you how to create perfect intimate atmosphere for new exciting experience in bedroom. We read it together with my wife and both enjoy it. Thanks for teaching us Tantric massage, it was perfect and just in time. Recommend!

This book is grossly mistitled. It has nothing to do with mastery. It basically says, take a bath, set the mood with candles and music, massage the whole body. Thatâ™s it. There is nothing about technique both on the mechanical and energetic level.
