Test Preparation & Review

Customer Reviews

Literally the worst flash cards ever published. Spelling and grammar in correct. No actual information. For example on the "define AIDS" card the flip side says "the patient's immunity is ruined." I want my money back.

The Mometrix flash card system is different than other flash card systems I have used. Rather than having a review question on the front and answer/rationale on the back, the Mometrix questions include a question on the front and in-depth discussion on the back. I was surprised at first, but after using the system for a few weeks I see this is more of a test preparation than just learning rote answers to questions. I will continue to use this system for the next year, until my test. I like the format very much.Lisa D.

This collection of flashcards is geared towards the testing material and stays focused on what you need to study. The organization of the cards is easy to follow as well. The information is grouped by main and subheading testing objectives.

DO NOT BUY! Under no circumstances should you even consider buying this product! In no way does it cover the depth and breadth of the material you need to know to pass either the AANP or ANCC. Questions are very general and inappropriate for the level of knowledge required as a Nurse Practitioner to practice. It is overpriced and completely inadequate!
