Mapping: A Critical Introduction To Cartography And GIS

Synopsis

Mapping: A Critical Introduction to Cartography and GIS is an introduction to the critical issues surrounding mapping and Geographic Information Systems (GIS) across a wide range of disciplines for the non-specialist reader. Examines the key influences Geographic Information Systems (GIS) and cartography have on the study of geography and other related disciplines Represents the first in-depth summary of the 'new cartography' that has appeared since the early 1990s Provides an explanation of what this new critical cartography is, why it is important, and how it is relevant to a broad, interdisciplinary set of readers Presents theoretical discussion supplemented with real-world case studies Brings together both a technical understanding of GIS and mapping as well as sensitivity to the importance of theory

Book Information

Paperback: 232 pages

Publisher: Wiley-Blackwell; 1 edition (February 1, 2010)

Language: English

ISBN-10: 1405121734

ISBN-13: 978-1405121736

Product Dimensions: 6.8 x 0.6 x 9.8 inches

Average Customer Review: 2.0 out of 5 stars [See all reviews](#) (4 customer reviews)

Best Sellers Rank: #804,045 in Books (See Top 100 in Books) #133 in [Books > Science & Math > Earth Sciences > Cartography](#) #658 in [Books > Science & Math > Earth Sciences > Geography > Regional](#) #1680 in [Books > Textbooks > Science & Mathematics > Earth Sciences](#)

Customer Reviews

This book is a self indulgent piece of tripe. I found it poorly written and poorly edited and was forced to buy it by the author.

I found this book very hard to read. I could not stay focused due how the author jumps around to different subjects within the subjects of the chapters A LOT.

Short chapters make this book easy to read.

Book arrived damaged from the method of packaging. Also, discusses only theoretical background

of mapping, with little actual information on the technical terms associated with cartography or GIS
