This book is very popular, and has raised many questions on the authenticity of it's approach. Many of the Fuqahah disagree with the methodology of Fiqh based on the Sunnah versus Fiqh based on the 4 main madhabs. I don't know the answer to that question, but I can say the book is very straight forward, easy to read, and hits on every major aspect of Islam. I've read and reread this series several times, and am quite impressed with the information provided. All rulings are based on the Quran, Sunnah and hadith. Recently though, I've started to question the idea of following the fiqh 'us sunnah vs the 4 schools, and thus my opinions on this series is changing. The book is hardcover, the paper extra thick, and the font is readable and nice. Very good binding.

This is one of the most popular set of books that you will see in Islamic bookstores. It is commonly sold in sets of 1/2 inch thick red hardback books. [This version] appears to be of a higher quality than the the ones printed commonly available that are printed in the Mid East. Fiqh us Sunnah means the scientific study of Hadith and it authenticity based upon verification of the lineage of original narrators of the hadith, and the degree of confidence in the teaching of a particular hadith. This is a must have for those that are in search of authentic hadith, and wary of questionable ones.
