Is this satire? I have read all four to date. I think teens who like paranormal stories would like these. I thought the first three were better than this one. The authors just keep adding more types of fantasy/paranormal and they seem to try to have "Jessie" in her thoughts explain away inconsistencies. Don't get me wrong: they spin a good twisty yarn and some of the characters like Ginny are especially likeable. But they have pulled in soooo much---witches,ghosts,other universes or dimensions, Greek Ggods,magic artefacts,time travel, shape shifters,vampires,werewolves,----so much that especially this one,had me constantly trying to sort out who was who. The twenty something female in a small town with antiques,festivals and ghosts,is a very good start. But by book four--this one-- it seems like the authors are searching for reasons to have a murder and ways to make itsupernatural. Overall,fun stories in each book, with very well written characters,and a charming southern town I'd like to visit. BUT by this book, there is so much going on that the story is losing both charm and cohesiveness.

I love this series, and all the characters that are in it. There are moments when you can't help but laugh out loud at some of the antics. I think my favorite character is the grand mother and the dog. I can't really think of any reason that I don't like it. I received this book for free for an honest review.

I read an arc copy of this book. I had been looking forward to this episode in the lives of Jessie and friends. As with previous books in this series, you have the main characters. They seem to grow with each book. In this one, you find out more about the characters. What put them in the timeline they are in. Who they really are. Some secrets and some surprises. Add in new people and mysteries. Jessie and the gang have surprises all around them.Jessie walks into breakfast one day and meets a young couple that just don't seem to belong. While finding out something about them, in walks more new guests to the Haunted Inn. He's a big blustery man with a young girl who he claims is his niece. Along with several other people. That night is Fright Night at the inn as well as a super moon. Little does Jessie know, it will also be a night for murder. From there, they take trips in and out of the secret doors in the basement. To the time of Marie Antoinette and to Germany. Who knows where they will end up? Will they get answers that they need? Will they solve the murder? Will the sheriff catch on that all is not what it seems? Join Jessie and friends for this adventure. It's a really good ride. Now I wait to find out more secrets and mysteries. I can't wait.

As a member of the ARC I am was given a free copy in return of an honest review of this book. So here goes, it was a great book, I have read the entire series so far and I have given the same mark to all of them. The writers of the book are superb, the plot is fantastic, it takes you back to the time of the French revolution, the characters are wonderful, they are consistent and flowing. I would have read it in one day, but life got in the way, but I do recommend reading the entire series, they could be read alone, but reading the entire series is better. If you did not believe in werewolves and vampires, well you better start believing in them now, because that is what involves the murder in this book, and thanks to Jessie and her gang they solve the mystery. I will not be the one telling you how nor giving out to many details, you will have to read it yourself, but it is an easy read and a fantastic one at that. So sit back, enjoy a glass of ice tea and relax

I received a ARC copy of this book for a honest review. I can honestly say I am a huge fan of Constance Barker and I also love books about the supernatural. This is the first book I have read in this series co authored by A.J .DeBellis. Maybe if I had read the other books in this series I would have had a easier time understanding the characters and keeping up with who was changing into who. I enjoyed the plot but just found it hard keeping up with the time traveling and characters constantly changing.

I received an ARC copy for my honest opinion. I have read the previous books in this series which I think helps with the characters. This book is not as good as the other ones. There is just too much going on. It seemed like the author would think of a situation, then make up a power that Jessie developed on the spot to throw at it. It was very confusing also with the characters being more than one person or in more than one time. Hard to follow.

The storyline was so well thought out and engaging that I didn't want to put my kindle down. The added mythical creatures open up so many possibilities for future books and I hope to see many more of this wonderful series.â™;I received an arc copy of this book in exchange for an honest reviewâ™;

Love this series. Waiting with bated breath for the next installment. This is a fast paced, unique story line. Combines Greek mythology, Aliens, Witches and Shape Shifters. All this in a small tourist town and the solving of mysteries as well.
