Learn Descriptive Cataloging - Second North American Edition (Library Education Series)

Synopsis

LEARN DESCRIPTIVE CATALOGING Second North American Edition A Practical Study Guide For Learning Anglo-American Cataloging Rules MARC 21 Codes And Library of Congress Authorities

All the fundamental skills of descriptive cataloging are covered here: using AACR2, and coding descriptions and access points into MARC format. All catalogers, whether professional or paraprofessional, need these basic skills. Consequently, this guide is equally suitable for college students studying library science, and library technicians and others who want to know more about cataloging, with a specific goal or as part of their professional development. Since the bibliographic record is the foundation of all the tools used in a library, from catalog to bibliography to online database, it is important for all library staff to be familiar with at least these basics. This book contains many clear explanations and examples, along with numerous practice exercises that help students master creating MARC descriptions and access points. It includes the relevant MARC codes, a glossary, an index, and answers to exercises at the back of the book. Learn Descriptive Cataloging is one of nine study guides in the Library Education Series. Please see the back of this book for a complete listing, or visit www.totalrecallpress.com for more information. Mary Mortimer is a librarian, library and Internet trainer, author, multimedia developer, and publisher. Since her professional education in the Universities of Sydney and New South Wales, Mary has worked in libraries in Australia, Papua New Guinea and Britain in many capacities. She is a director of DocMatrix Pty Limited in Canberra, Australia, which publishes workbooks to help librarians and assistants develop the practical skills they need in the workplace. These books have been modified for libraries in Southeast Asia, South America and North America. Mary has also developed interactive multimedia programs for librarians, and organizes in-service training for library assistants. She has taught cataloging to library paraprofessionals and professionals, including staff of the National Library of Australia, and in doing so has refined her explanations and examples. The result is this clear and comprehensive study guide that helps students and staff apply cataloging rules and standards sensibly and correctly.

Customer Reviews

I had to buy this book for my advanced cataloging class and I thought it was an excellent book for catalogers of any age and skill. Every section is short and sweet with exercises (and answers in the back)that help you perfect your skills and knowledge of how to make MARC records as well as to familiarize yourself with AACR2 Rules.I highly recommend this book for someone beginning to learn cataloging or if you just need something for a quick reference guide on homework or at work.

i need this textbook for class, and did not have a choice in purchasing, but it is too brief-not enough details

I had to read this for an intro to cataloging course.The book is useful as supplemental material.All the basics are covered.The exercises were very helpful.

A helpful and very easy to read textbook. Lessons followed with exercises to solidify the material.
